CURBELL
MEDICAL

OUR LONG HISTORY

Curbell has been supplying hospitals and long-term care facilities with innovative products for over 50 years. We have strong relationships with bed, television, and nurse call system manufacturers, and we work closely with them to ensure that our products work properly and safely with all types of equipment. Most importantly, we work with you, to create custom solutions that meet your requirements and specifications.

NURSE CALL EXPERIENCE

From our beginning, Curbell has been involved in connecting hospital room equipment to various types of nurse call systems. Since then, we've become an industry leader in nurse call system integration, and we use this expertise to make sure that our equipment properly interfaces with your nurse call system, no matter what brand it is.

OUR COMMITMENT TO QUALITY

Curbell works to continuously improve our operations, products, and services. Our quality management system complies with ISO 13485:2003 (CMDCAS), and we are compliant with all government and industry regulations. We are also medical device listed, and are a current Good Manufacturing Practices (cGMP) Compliant Facility.

QUALITY AND OXYGEN SAFETY
KEEPING YOUR PATIENTS SAFE

The healthcare industry has important regulations associated with UL compliance and oxygen safety that impact nurse call accessories (visit www.oxygensafe.com for more information). The nurse call accessories manufactured by Curbell continue to meet not only oxygen safety standards, but all other applicable compliance standards.

Nearly all of Curbell's nurse call accessories are UL Listed and all are tested directly with the intended nurse call systems and healthcare televisions to ensure the highest level of safety and regulatory compliance.

▶ All our pillow speakers are medical device listed

▶ We are a UL testing facility

▶ We are certified to ISO 13485:2003 (CMDCAS)

NURSE CALL DEVICES
KEEPING YOU CONNECTED

Hospital patient rooms depend on connectivity, between patients and nurses, and the various technologies that impact the patient experience; and Curbell Medical is a crucial part of the ever-evolving interface that makes all of these connections possible.

By combining our deep institutional knowledge and decades of experience, we create innovative solutions that make hospitals more efficient, and improve patient comfort and safety. It's instant peace of mind, and it's as easy as pressing a button.
Gen4
pillow speakers

PATIENT SATISFACTION
THE LITTLE THINGS ADD UP

When they're in your hospital, your patients' main concern is their health. But if you ask them how satisfied they were with their stay, they're likely to mention the things that can affect your HCAHPS scores, like the noise level, the cleanliness of the room, and their experience with the television. Good experiences with all these little things can lead to a positive overall experience, and maybe even higher patient satisfaction scores for your hospital.

These are the things we thought about when we designed Gen4. We included key design features that will help you in your efforts to reduce noise, control infection, and offer a better overall patient room experience. On their own, little things like these might not mean much; but together, they add up to one more thing to be satisfied about.

MORE HOSPITALS CHOOSE GEN4 THAN ANY OTHER PILLOW SPEAKER. HERE'S WHY:

PATIENT SATISFACTION
These days, patients expect more than just quality care. They expect many of the comforts of home in a peaceful environment, and your patient satisfaction surveys will reflect this. Gen4 gives them a quality TV experience that will help keep them satisfied, with its large, easy-to-press buttons, clear sound, and comfortable shape.

INFECTION CONTROL
A single hospital-acquired infection can cost your facility tens of thousands of dollars[1], so we made sure that Gen4 was fully sealed* to help prevent infectious contaminants from getting into the pillow speaker where they could be passed from patient to patient. In addition, Gen4's smooth shape allows for quick and easy cleaning.

SOUND OPTIONS
87% of hospitals recognize that they have a noise problem[2]. If yours is one of them, you can minimize noise by using headphones and a Gen4 pillow speaker with an optional headphone jack. Patients will be more satisfied with their TV experience without being distracted by noise, and nearby patients and staff will benefit from a quieter environment.

EASE OF USE AND DURABILITY
Gen4 isn't just easy for patients to use, it's easy for your staff. We have 50 years of experience integrating nurse call systems and TVs, so installation and reprogramming for new TVs is simple. It's also built to last, with high-impact case material and a flexible cable. But hospitals are a tough environment, which is why we give you the option to easily replace the cable, speaker, headphone jack, and overlay in the field if they get damaged.
PATIENT ROOM INTEGRATION
The pillow speaker is at the center of the patient room experience, giving patients access to their care team, entertainment, and environmental controls, so we work closely with the manufacturers of these systems to make sure everything works together seamlessly. This is part of the reason why Curbell is trusted by every nurse call system manufacturer in the US to supply the pillow speakers for their systems.
REGULATORY COMPLIANCE
In the US, pillow speakers are classified as Class 2 Exempt medical devices. Curbell is fully compliant with all government registrations and industry regulations. Gen4 is designed, manufactured, and tested to strict standards (including UL 1069) to give your patients a reliable connection, and to give you one less thing to worry about.

* units without a heapdhone or keyboard jack have an Ingress Protection Rating of IP54 as defined by IEC 60529

THE GEN4 PILLOW SPEAKER

DURABILITY
The high-impact case material is designed to withstand over 100 drops onto a concrete floor without impacting its functionality.

FULLY SEALED UNIT
The sealed design reduces the potential risk of infectious fluids or solids settling into the unit — even in the speaker area.

AUXILIARY FUNCTIONS
The Gen4 platform allows for up to six auxiliary buttons to control lighting, temperature, drapes, nurse call requests, etc.

LARGE BUTTONS
Large buttons are recognizable at a glance and easy to press. The clean layout makes contacting the Nurse and controlling TV functions simple.

SUPERIOR SOUND
Clear, high quality sound to increase patient satisfaction.

COMFORT-GRIP CASE
The lightweight ergonomic design mimics the comfort and familiarity of a home TV remote.

EASY-TO-CLEAN CASE
The streamlined design facilitates quick and easy cleaning with most hospital cleaning agents.

REPAIRABILITY
You can utilize Curbell's repair service or choose to make basic repairs yourself, including quick cable replacement.

FLEX AND STRAIN RELIEF
The long flex relief was designed for longer life and greater flexibility. Internal strain relief prevents damage to internal components.

CHOOSE FROM TWO STYLES

DirectAccess (our most popular format, pictured above): the user can directly access individual channels through the numeric keypad

DPS: the user cycles through channels using the large channel up and down buttons

ADDITIONAL GEN4 FEATURES

OPTIONAL HEADPHONE JACK
Plug in 1/8" plug earphones to create a quieter environment. Your patients will appreciate the ability to hear the TV better, and everyone else will appreciate the peace and quiet.

ANALOG VOLUME CONTROL
Analog volume is available to ensure independent patient control in situations where two devices (any combination of pillow speakers, beds, or Curbell Remote Entertainment Stations (see page 14) control one TV.

REPAIRABILITY
Gen4 is built to last; but hospitals are a tough environment, which is why we give you the option to easily replace the cable, speaker, headphone jack, and overlay in the field if needed.

GEN4 PILLOW SPEAKER ACCESSORIES

SINGLE-USE HEADPHONES AND EAR BUDS

▶ Help lower noise levels
▶ Lightweight and comfortable

| DESCRIPTION	MODEL #	PART #	PRICE
Black stereo headphones	HP-030	7584	$2.75
Black mono headphones	HP-050	7585	$2.75
Black mono ear buds	HP-200	7586	$1.75

NOTE: Cases of 100 available. Contact your sales representative for pricing.

BREAKAWAY CONNECTION

Save time and money, and minimize plug and station damage from everyday wear with the pillow speaker breakaway solution from Curbell. The "pinless" cable plug fits into a mating cable that is secured to a dedicated wall receptacle. It provides a reliable connection that releases with a determined amount of force, taking the strain off the wall connection.
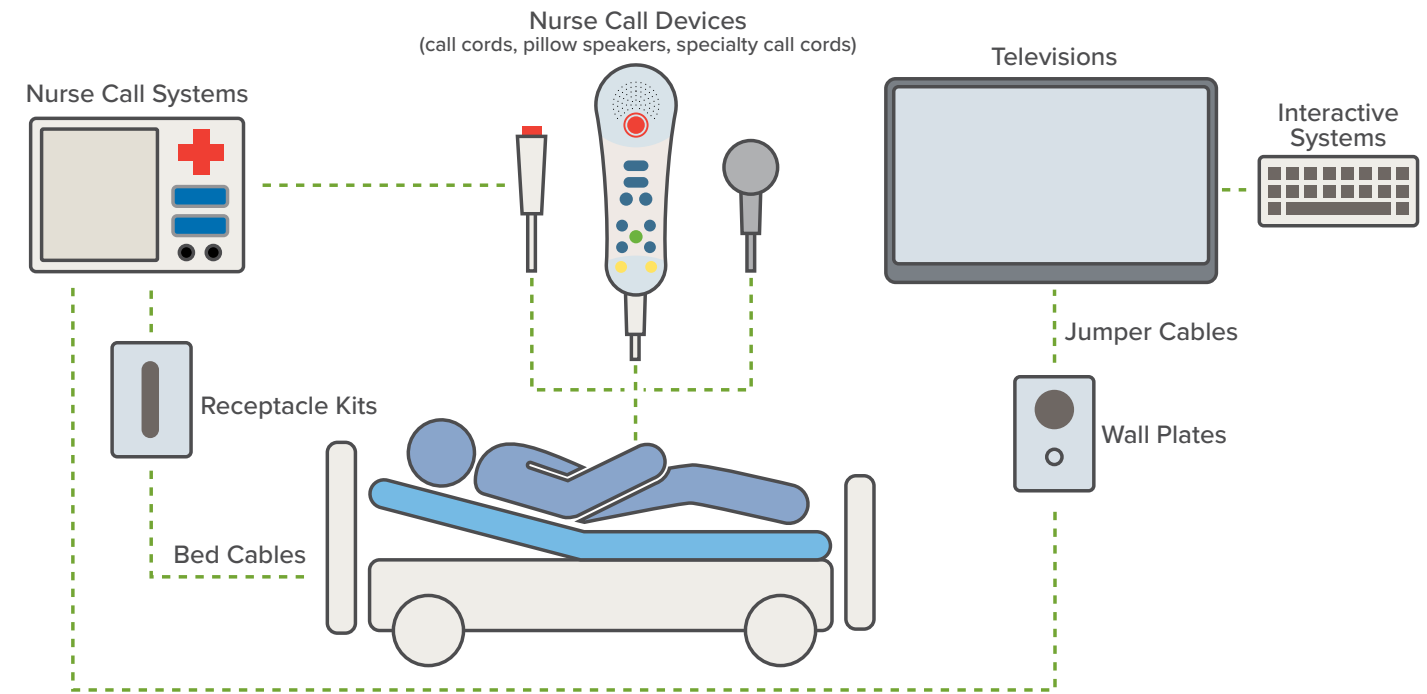

▶ Reduces damage to pillow speaker plug end
▶ Eliminates damage to nurse call patient stations
▶ Provides a means to standardize pillow speakers in your facility

PILLOW SPEAKER HOLDER

The optional Pillow Speaker Holder mounts to the wall or headwall and keeps Gen4 Pillow Speakers secure.

CUSTOMIZED SOLUTIONS
WE'RE HERE TO HELP

Among the dozens of nurse call systems, televisions, interactive systems, and beds available, there are tens of thousands of configurations possible in any hospital room. Once you add in lighting options, wiring inconsistencies, and additional special features, it's easy to see that designing and specifying the products that enable communication between these systems requires a lot of expertise.

Curbell Medical works closely with all the manufacturers of these systems to make sure that our products operate properly, and our knowledgeable staff can quickly help you select the right products to meet your specific requirements. You can count on Curbell to keep you connected.

The units shown here represent a small sample of the interactive and Smart TV pillow speakers available from Curbell.

GEN4 FOR INTERACTIVE AND SMART TV
HELPING KEEP YOUR PATIENTS ENGAGED

Curbell works with patient engagement system and Smart TV manufacturers to create Gen4 Pillow Speakers that are designed specifically for each system. Each pillow speaker gives you most features of our standard Gen4 Pillow Speaker, plus the ability to access and navigate through features specific to the patient engagement system or smart TV, like on-screen menus and guides. Contact Curbell or your patient engagement system manufacturer for more information.

DIGITAL INTERFACE BOX (IBI)

Pillow speakers no longer communicate only with standard televisions. Today's technology presents ever-increasing demands for various additional integrations. The Curbell IBI has many potential applications, including the facilitation of an interface between pillow speakers and USB- or IP-driven hardware. The box is FCC-compliant and carries a UL Listing to hospital standards. Please contact Curbell with your customized application needs.
ANALOG SOLUTIONS

GEN III ANALOG PILLOW SPEAKERS

These are our simplest pillow speaker offering, designed to support older, analog TV technology, basic nurse call functionality, and environmental control.

▶ Single button TV channel navigation
▶ Up to four environmental control buttons
▶ Safe for use in oxygen-enriched environments

HANDHELD PENDANT

Curbell's handheld nurse call pendants are perfect for areas where a speaker isn't necessary, such as areas with swing-arm televisions, or emergency rooms and intensive care units that don't have televisions.

▶ Large, colorful buttons are easy for patients to operate
▶ Overlay and switches can be tailored to your hospital's needs
▶ Can support up to four auxiliary functions
▶ Safe for use in oxygen environments
▶ Electrostatic Discharge (ESD) resistant design
▶ Self-extinguishing case material
▶ Repairable

SEALED HANDHELD PENDANT

The Gen4 Sealed Handheld Pendant brings the nurse call pendant into the 21st century, with its comfortable design,and industry-leading infection control and safety features.

▶ Proprietary sealed design (to IP67) keeps infectious contaminants out of the pendant
▶ Smooth shape and minimal crevices allow for easy, comprehensive cleaning, and reduce the potential for cross-contamination
▶ Modern, comfortable, ergonomic design fits naturally in the hand
▶ Large Nurse button is easy for patients to locate and operate
▶ Call assurance LEDs available for supporting systems
▶ Customizable auxiliary buttons
▶ UL Listing involves testing with the nurse call system to verify for safe use in an oxygen-enriched atmosphere

PILLOW SPEAKER TESTERS

CT-5
FOR RAULAND RESPONDER® 5 PILLOW SPEAKERS

The Curbell CT-5 tester is a portable unit designed to test any Curbell-manufactured pillow speakers compatible with the Rauland Responder 5 nurse call system. The CT-5 tester is to be used in conjunction with the included USB cable and a user-supplied desktop or laptop PC. It can test all Rauland Responder 5 Standard and Enhanced pillow speakers, as well as Curbell-manufactured "interactive" models compatible with the Rauland Responder 5.

Once connected to the tester and properly configured with a PC, you will be able to test the functionality of nurse call, nurse call workflow, environmental control auxiliaries, entertainment, call assurance, as well as speaker and microphone features.

▶ Quickly confirms functionality of buttons, LEDs, speaker and microphone
▶ Powered by the USB connection on the computer (no batteries or wall connection required)
▶ Automatic recognition of pillow speaker type
▶ Colorful graphical user interface indicates the unit being tested
▶ Visual and audio confirmation of working buttons
▶ Hardware and software included
▶ Designed for use with a computer running Windows XP, 7, or 8

The included software shows which pillow speaker functions are being tested

CT-300

The Curbell CT-300 Tester is a portable unit that allows you to test pillow speakers, call cords, Stryker® bed side rails, and Hill-Rom® analog SideCom™ bed side rails. The CT-300 interfaces to virtually any Curbell pillow speaker through interchangeable modules, and will test nurse call on all pillow speaker models and TV entertainment and auxiliary functions on most pillow speakers.

▶ Small, compact, and portable
▶ LCD display screen prompts for easy use
▶ Battery operated, AC adaptor included
▶ Order multiple adaptors for testing all equipment

THE REMOTE ENTERTAINMENT STATION
MAKE A PATIENT ROOM A FAMILY ROOM

Curbell's Remote Entertainment Station provides convenient wall-mounted control of a healthcare grade television, and up to four low-voltage room auxiliaries for visitor use. It allows supplemental television access without disturbing the patient, preserving a quiet atmosphere. It can also be used in waiting and lobby areas to eliminate the need for remote controls.

The Remote Entertainment Station provides easy access to the same TV features as a pillow speaker.

Visitors can watch television in the hospital room without disturbing the patient.

In waiting rooms, audio is brought to the seating area, helping to create a quieter atmosphere.

- ▶ Creates a visitor-friendly, home-like environment
- ▶ The Remote Entertainment Station is easily reprogrammed for any healthcare grade television
- ▶ Allows control of up to four room auxiliaries such as lighting, temperature, and drapes
- ▶ Two headphone jacks are ideal for creating a quieter environment
- ▶ Easy to install and repair
- ▶ Two year warranty

| SPECIFICATIONS	
Case	High impact plastic (ABS), UL flammability rating 94V-O
Dimensions	8.5" W x 5" H x 1.25" D
Mounting	Mounts to a two gang masonry box
Switches	SPDT momentary contacts for connection to power-limited circuits of 3OV DC, 500 mA or less
Wiring	Cable harness included

PILLOW SPEAKER REPAIR SERVICE

Curbell's highly trained repair team has the expertise to troubleshoot equipment malfunctions, provide timely repair, and keep your patient rooms connected. Save time and money by sending Curbell your damaged or malfunctioning pillow speakers. If you'd like to repair your pillow speakers yourself, see page 79 for parts and prices.

▶ Quick turnaround

▶ Repair available for most brands and models

▶ 90-day limited warranty against defects in materials and workmanship

1 Call Curbell for an RMA number, then ship the product to us.

2 The product is received in and routed to the correct repair station.

3 The product is cleaned inside and out.

4 The product is refurbished to original specifications.

5 The product is 100% tested.

6 The product is shipped back to you with a new 90 day warranty.

CALL CORDS
A SIMPLE SOLUTION

Call cords may be the simplest type of nurse call device, but they're often the best choice for areas without TVs, or for situations where a patient has special needs. Curbell's wide range of standard and specialty call cord options lets you handle any situation.

CHOOSING A CALL CORD

Which type of call cord is right for you?

Curbell offers seven types of call cords to meet the needs of your facility and your patients. You can learn more about those options on the next six pages. If you need more help determining what solution is right for you and your situation, call your Curbell sales representative at 1-800-235-7500.

ADAPTORS

The needs of some patients may require that multiple nurse call devices are connected to your nurse call system. Our line of adaptors will give your nurse call system the flexibility to handle this increased demand. They're easy to install, feature strain relief on the cable, and are available with numerous receptacle options. Please call your Curbell representative to discuss the most effective solution for your specific needs.

BOX ADAPTOR

A mountable box style adaptor allows you to safely expand the interface capabilities of the in-room patient station. Curbell offers adaptors that have been tested directly with the nurse call systems to verify patient and system safety.

CONVERSION ADAPTOR

Specifically for instances when you have a single universal 1/4" nurse call device, but not a matching receptacle on the patient station, the conversion adaptor effectively changes the plug style.

JUMPER ADAPTOR

Help extend the life of your patient station and nurse call device cable with breakaway cables. Choose from 8-pin DIN, 9-pin DIN or 10-pin Modular styles.

Curbell ensures that these products are validated to meet your intended needs for nurse call communication. Please contact Curbell with any questions regarding these adaptors.

BED CABLES AND ACCESSORIES
BRING YOUR BEDS TO LIFE

With a custom communication cable from Curbell Medical, a bed comes to life. It becomes a communication center, linking the patient to nurse call systems, televisions, and other room technologies — even delivering potentially life-saving data. For more than 50 years, we have made sure that patients can expect the best possible experience; and our people make sure that our customers can expect the same. Let us help you find the right solution for you and your beds.

CHOOSING THE RIGHT SOLUTION

Which type of cable is right for you?

Between the dozens of bed models, connector styles, and nurse call systems, there are hundreds of bed communication options to choose from. You can learn more about those options on the following pages. If you need more help determining what solution is right for you and your situation, call your Curbell sales representative at 1-800-235-7500.

	BREAKAWAY CABLE (pages 33-39)	STANDARD INLINE CABLE (page 40)	STANDARD 90° CABLE (page 40)	BED-TO-NURSE CALL CABLE (pages 41)
You're plugging into a standard 37-pin receptacle or Hill-Rom® Bed Interface Unit	●	●	●	
Space is too tight for an inline cable	●		●	
You're plugging directly into a patient station	●	●	●	●
You want to control lights or TV from the bed	●	●	●	●
You're having issues with plug and receptacle damage	●		●	●
Allows standardized bed connection in rooms with different bed or nurse call systems	●			

BREAKAWAY CABLES
PROTECT YOUR WALLS AND YOUR PATIENTS

If your bed cables and wall receptacles are being damaged, Curbell's Breakaway Cables can help put an end to it. The unique two-piece design safely breaks apart at a point away from the wall receptacle or wall patient station, reducing cable replacement and receptacle repair costs, and most importantly, minimizing patient risk.

SOLVE THESE COMMON PROBLEMS

[1] NON-STANDARDIZED BEDS AND NURSE CALL SYSTEMS

If your facility has multiple types of nurse call systems or beds, moving beds from room to room can be a challenge.

Curbell's breakaway cables give you a common connection in every room regardless of bed type or nurse call system. One section is permanently attached at the wall, and the other section is permanently attached to the bed. Use them throughout your facility, and you can freely move beds from room to room.
[2] RECEPTACLE AND CABLE DAMAGE

Is this a common sight after a bed gets moved? It doesn't need to be.

Aside from being a costly repair, a damaged wall receptacle or patient station can put a room out of service for days. By using a breakaway cable from Curbell, you minimize the chance of this type of damage happening. If the bed is moved without disconnecting the cable, the unique two-piece design safely breaks apart at a point away from the wall, reducing cable replacement and receptacle repair costs, and most importantly, minimizing patient risk.

Cables and wall receptacles incur damage when the bed cable isn't unplugged before moving the bed.

The pinless connectors on our breakaway cables have no pins to break.

[3] UNUSED BED FEATURES

Are the advanced features of your beds going unused because it's too much trouble to plug them in?

With a bed communication cable from Curbell Medical, a bed comes to life. It becomes a communication center, linking the patient to nurse call systems, televisions, and other room technologies — even delivering potentially life-saving data. Using a breakaway cable lets you use all the features of the bed while having a simple and quick way to disconnect the bed when it needs to be moved.

STANDARD BREAKAWAY CABLES

USING THE BREAKAWAY CABLE IS SIMPLE
1 Plug the wall end of the cable into the wall plate and tighten the thumbscrews.

2 Install the bracket to permanently mount the cable (see page 38-39 for information on brackets).

3 Plug the cable into the bed, tighten the thumbscrews, and screw the strain relief clamp into the bed to permanently mount the cable.

4 Connect the breakaway cable's pinless connectors.

5 When moving the bed, disconnect the cables and place the dummy plug into the wall end of the cable.

THUMB SCREWS
permanently attach to the bed

WALL END
permanently plugs into wall receptacle (secured with wall mounting bracket)

STRAIN RELIEF CLAMP
mounts to the bed

DUMMY PLUG
to silence a cord-out alarm while moving beds

FLEXIBLE CABLE
allows the breakaway plug to move freely and minimize wall damage

CABLE TETHER
nylon coated to help prevent short circuits

MOLDED ARROWS
ensure that the cables can't be connected incorrectly

STANDARD 37-PIN STYLES (SEE PAGES FOR OTHER CONNECTIONS)

Part numbers for most common standard 37-pin connections are listed below.
Wall and bed half cables are also available separately in 1, 2, 4, 6, 8, 10, 12, and 15 foot lengths.

For Ascom/GE Telligence® Patient Stations
Our breakaway cable for Telligence systems use extra long screws provide a secure fit at the patient station.

For Rauland® Patient Stations
The 800/102 Breakaway Cable allows the wall half of the breakaway cable to be plugged directly into Rauland patient stations with an 8-pin DIN for regular nurse call and a 1/4" auxiliary port (for the bed exit alarm).

For Patient Stations with 1/4" jacks
The 1/4" Breakaway Cable allows for Bed Exit and/or Nurse Call-only applications. It's a simple and reliable solution when you don't have the need or ability to use a Centronics Breakaway Cable. Call your Curbell Representative for additional plug styles.

NOTE: Call for complete breakaway cable part numbers. Part numbers shown above are based on standard wiring and may not work for your specific requirements.
Wall End and Bed End half cables are also available. Call your Curbell sales representative for information about cables for other nurse call systems and custom lengths

BREAKAWAY CABLE LOCKING SOLUTIONS

For a cable to separate at the breakaway point, it needs to be secured at both the bed end and the wall end. Curbell offers several options to secure the cable to different nurse call receptacles or Bed Interface Units.

37-PIN WALL PLATES AND BRACKETS

1 INLINE CABLE WALL PLATE/BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
Allows you to secure inline breakaway cables.	WPA-0719	13971	$29.95

2 90° CABLE WALL PLATE/BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
Allows you to secure 90° breakaway cables.	WPA-0713	13968	$29.95

3 BRACKETLESS WALL PLATE

DESCRIPTION	MODEL #	PART #	PRICE
Allows you to secure the breakaway cable using the bed cable mounting screws	WPA-0608	13944	$11.00

4 DUAL 90° LOCKING BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
Allows you to secure two 90° breakaway cables to an existing dual 37-pin wall plate	BRK-1007-001	17036	$6.43

Wall Plate Mounting

Our breakaway cable wall plates can be connected without rewiring. Just remove the existing wall plate, then connect your existing female 37-pin receptacle to the male 37-pin connector on the back of the breakaway cable wall plate.

HILL-ROM AUDIO STATION BED CONNECTOR (ASBC) BRACKETS

5 INLINE ASBC CABLE BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
For securing inline cables to Hill-Rom Bed ASBC Units	HDW-3007-001	19405	$7.95

6 90° ASBC CABLE BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
For securing 90° cables to Hill-Rom Bed ASBC Units	HDW-3006-001	19253	$7.95

HILL-ROM BED INTERFACE UNIT BRACKETS

7 BIU CABLE BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
For securing inline and 90° cables to Hill-Rom Bed Interface Units	HDW-3000-001	7511	$3.95

8 BIU 90° CABLE BRACKET

DESCRIPTION	MODEL #	PART #	PRICE
For securing 90° cables to Hill-Rom Bed Interface Units.	HDW-3005-001	7512	$6.95

ADDITIONAL PARTS

9 WALL OR BED CABLE BRACKET

Wall Mount   Bed Mount

DESCRIPTION	MODEL #	PART #	PRICE
For securing cables to beds or non-37-pin wall plates	HW-150	7596	$1.50

10 ASCOM/GE TELLIGENCE SCREW

DESCRIPTION	MODEL #	PART #	PRICE
Longer screws for securing breakaway cables to Telligence patient stations (two are required per patient station)	HW-814	7645	$.75 each

STANDARD BED COMMUNICATION CABLES

A full variety of connector types are available, enabling you to connect from the bed to your 37-pin wall receptacle, or Hill-Rom® Bed Interface Unit.

▶ Available for most beds, including those from Amico, ArjoHuntleigh®, Carroll® (CHG®), Hill-Rom®, Joerns, Kreg Medical, Linet®, Next Health, Rotec, Sizewise, Stryker®, Stryker London, and Umano Medical

▶ Solid metal pins provide the most strength and reliability

▶ Inline or 90° plugs

▶ 8' standard length, other lengths available

▶ One year warranty

Solid Pins vs. Rolled Pins
✅ **Solid Pins (Cross Section)**
Curbell's bed cables use solid gold-plated pins to provide greater strength and stability.

❌ **Rolled Pins (Cross Section)**
Many inexpensive bed cables use rolled pins, which are hollow and can deform easily.

JU96-070 90° cable

JU96-060 inline cable
The most common 37-pin bed communication cables are shown below. Contact your Curbell sales representative for information on other styles.

WALL END	BED END	LENGTH	MODEL #	PART #

STANDARD BED-TO-NURSE CALL CABLES

If you need to interface your beds with your Nurse Call system, Curbell can meet your specific wiring needs for the hundreds of possible configurations.

▶ Available for most beds, including those from Amico, ArjoHuntleigh®, Carroll® (CHG®), Hill-Rom®, Joerns, Kreg Medical, Linet®, Next Health, Rotec, Sizewise, Stryker®, Stryker London, and Umano Medical

▶ Inline or 90° 37-Pin connectors

▶ For all common Nurse Call systems (see chart below)

▶ 8' standard length, other lengths available

▶ One year warranty

37-PIN DUMMY PLUGS

Curbell's dummy plugs eliminate cord-out alarms when the signaling device isn't plugged in. They are available for virtually any nurse call system or dedicated in-wall bed port. Common styles are shown below. See page 30 for nurse call dummy plugs.

LOW VOLTAGE CONTROLLERS
GIVE YOUR PATIENTS CONTROL OF THEIR ENVIRONMENT

Curbell's low voltage controllers allow patients to safely operate high-voltage circuits such as lights, electric doors, and drapes with their pillow speaker or bed communication side rail. We offer models to mount either in the wall/headwall or in the lighting fixture itself. Our latest model, the LVC-2000 (page 44), is our most advanced low voltage controller yet, with the ability to control up to three loads with dimming.

LOW VOLTAGE CONTROLLERS
FOR LIGHTING FIXTURE APPLICATIONS

LVC-2000 SERIES
▶ True universal voltage (120 to 277 VAC)
▶ Can control lights with multiple modes of operation:
  • Three loads independently
  • Two loads sequentially and a third Load independently
  • One load independently with 0-10V dimming control and second and third load independently
  • Two loads independently with 0-10V dimming control and a third load independently

LVC-2000-001
▶ For use with fluorescent, LED, and other lamp types
▶ **Supports one direction dimming 100% to off**

LVC-2000-004
▶ For LED lamps only
▶ **Supports bi-directional dimming with quick on/off**

with **DIMMING** control
The small size allows it to mount inside a lighting fixture.
Four modes allow for numerous configurations including dimming.

Side-mounted DIP switches let you switch between modes before installation.

Color-coded push pin connectors make installation quick and simple.

LC-060
▶ For use with fluorescent, LED, and other lamp types
▶ Mounts in a lighting fixture
▶ Controls two loads independently (on/off), or two loads sequentially (on/off)

CORD SAVER

DESCRIPTION	LENGTH	MODEL #	PART #	PRICE
9-pin DINcord saver with clamp	2'	JUP-9000-2	8518	$35.95

THE CORD SAVER

When a pillow speaker cable gets pulled from the patient station, there's potential for damage, which can cause intermittent nurse call functionality, false alarms, and patient station repair costs.

Our cord saver breakaway cable secures to the wall and safely breaks apart at a point away from the patient station, reducing cable replacement and patient station repairs.

▶ 9-Pin DIN Male to 9-Pin DIN Female
▶ Authorized by Rauland for their Responder 5 system
▶ Guide markings to match system and pillow speaker cable

  Please call our toll-free number for the exact shipping charge

▶ COD: Pay the full amount including shipping upon receipt

▶ Visa, MasterCard, Discover, and American Express
  are gladly accepted

▶ Shipping and handling charges will be added to every order

SELLER'S LIMITED WARRANTY

Unless otherwise stated in the limited warranty contained in literature that is shipped with the product (in which case the product literature limited warranty will in all respects apply), the Seller warrants the Buyer that the products will be free from defects in workmanship and materials under normal use for the period of two years from the date of the applicable invoice for pillow speakers and a period of one year from the date of the applicable invoice for all other products and repair services. Repair of pillow speakers is under a 90-day limited warranty against defects in materials and workmanship.

HOW TO RETURN MERCHANDISE

All returns must be processed within 60 days of delivery date and are subject to a 25% restocking fee. Product must be in new, resalable condition, and in the original packaging. Custom-made items are non-returnable. Contact Customer Service at 1-800-235-7500 and ask for a return merchandise authorization number (RMA#). Enclose this RMA# with the item, print the RMA# on the outside of the package, and mail it to:

Solutions, Inc.

Hospital patient rooms depend on connectivity — between patients and nurses, and the various technologies that impact the patient experience.

Curbell Medical is a crucial part of the ever-evolving interface that makes all of these connections possible. By combining our deep institutional knowledge and decades of experience, we create innovative solutions that make hospitals more efficient, and improve patient comfort and safety. It's instant peace of mind, and it's as easy as pressing a button.
